PROFESSIONAL SUMMARY

Computer Science student at the University of Michigan–Flint with hands-on experience in C++, object-oriented design, and data structures. Led a team project building a functional digital logic simulator and developed multiple data structure implementations. Brings demonstrated leadership experience and a strong academic record including a 3.4 GPA and President's Scholarship.

EDUCATION

University of Michigan–Flint

Bachelor of Science in Computer Science (ABET-Accredited). President's Scholarship Award.
GPA: 3.4.

Flint, MI

Expected December 2027

Relevant Coursework: Digital Logic Design, Object-Oriented Programming, Data Structures, C++ Programming, Computer Networks, Database Design, Computer Architecture, Intro to Linux/Unix, Discrete Structures, Physics I & II

PROJECTS

Digital Logic Simulator

Spring 2025

Team Leader

- Led a team to design and implement a digital logic simulator with CLI-based output.
- Built simulation logic using priority queues, pointers, operator overloading, and file parsing in C++.
- Coordinated team collaboration to ensure functional design and accurate logic flow.

Data Structure Projects

2024 – 2025

- Implemented multiple data structures from scratch, including linked lists, dynamic arrays, and priority queues.
- Applied algorithmic principles to optimize data manipulation and improve runtime efficiency.

Tic Tac Toe GUI Game

Spring 2025

- Built a GUI-based Tic Tac Toe game in C++ using the wxWidgets framework.
- Implemented game logic and user interaction handling for a smooth, interactive experience.

EXPERIENCE

Order Pickup and Delivery Team Member

June 2026 – Present

Menards

Clio, MI

- Operate forklifts and order selectors to retrieve, stage, and load merchandise for customer pickup and delivery.
- Fulfill online and in-store customer orders accurately using inventory management and order processing software.
- Deliver customer service by greeting guests, verifying pickup documentation, and loading merchandise safely.

Shift Lead

April 2022 – June 2026

Taco Bell

Flushing, MI

- Supervised team operations and enforced compliance with quality and safety standards.
- Trained and mentored new employees to meet performance expectations.
- Resolved customer concerns with professionalism and efficiency.
- Maintained accurate records and ensured all shift tasks were completed on time.

SKILLS

Programming: C++, SQL, R, Object-Oriented Design, Git, GitHub, Vim

Technical: Data Structures, Digital Logic Design, Computer Networks, Database Design

Software Tools: Quartus II, wxWidgets, Microsoft Office, Linux/Unix

ACTIVITIES & LEADERSHIP

UM-Flint Coding Club

2024 – Present

Member

Varsity Basketball

September 2024 – March 2025

Team Captain

LeetCode

Independent Practice

- Regular algorithmic problem-solving practice.
